

# Tips during COVID-19

## FOR DRIVERS AND PASSENGERS

### If You're a Driver

#### DON'T DRIVE SICK

If you've been feeling unwell at all, your car could be filled with dangerous microbes. Stay at home to prevent yourself or others from getting ill.

#### CLEAN YOUR CAR

Spray the disinfectant on a surface and **let it sit there** for at least 15 minutes or until it dries.

#### WEAR GLOVES

Use soft driving gloves that you can spritz with disinfectant as needed.

#### OPEN/CLOSE DOORS YOURSELF

Open the door for your passengers when you can to minimize the contacts with your car's surface.

#### TALK ABOUT IT

Let your passengers know what safety steps you've taken and what you expect to be done by them to make sure your ride is safe.

### If You're a Passenger

#### DON'T RIDE SICK

Don't endanger drivers and other passengers by sharing a ride while sick. Stay home.

#### WEAR GLOVES AND A MASK

Make sure to wear a mask that covers your nose and mouth. Spritz the gloves with a disinfectant before heading out.

#### KEEP YOUR HANDS TO YOURSELF IN THE CAR

Let the driver get the door (it's fine to ask) and keep your hands, elbows and all else to yourself. Want the window down? Ask the driver to do it.

#### MAKE SURE YOUR DRIVER IS HEALTHY

If the driver appears to be ill (coughing, sneezing, etc.), end the ride ASAP and be sure to let the rideshare company know. This way you will keep yourself and future passengers safe.

Stay healthy!
